EDUCATION

Ajay Kumar Garg Engineering College
B.Tech - Computer Science and Engineering

2021-2025
Ghaziabad, India

Work Experience

MAQ Software

Aug 2025 – Present

Software Engineer-1

Greater Noida

- Contributed to the **Origence** project by identifying and resolving **backend** vulnerabilities, improving both application security and **performance**.
- Designed and implemented **secure, scalable** RESTful APIs, ensuring compliance with best security practices
- including authentication, **authorization**, and data validation.
- Played a key role in **debugging** and resolving **critical backend issues**, boosting system **uptime** and enhancing client satisfaction.

PROJECTS

Omnicontent AI [🔗](#) | [NextJS](#), [Express.js](#), [MongoDB](#), [Socket.io](#), [RabbitMQ](#), [Docker](#), [Gemini API](#)

2025

- An AI-powered **SaaS** platform designed to automate content repurposing by **intelligently deconstructing a single piece of long-form video or audio into a comprehensive suite of ready-to-publish assets** for various social media platforms.
- Engineered a **robust, asynchronous job processing system** using **RabbitMQ** and dedicated background workers to handle long-running tasks like **AI analysis and video transcoding**, ensuring a non-blocking and responsive user experience.
- Designed **back-end services** with **Node.js** and **Express.js** for scalability.
- Integrated the Google Gemini API for advanced, **multimodal** content generation, employing sophisticated prompt engineering to produce **structured JSON outputs**.
- Implemented a **real-time, interactive UI** using WebSockets (Socket.IO) for instant notifications

Doodle Deck [🔗](#) | [Flutter](#), [Node.js](#), [Express.js](#), [MongoDB](#), [Socket.io](#)

2024

- Developed an **interactive multiplayer** drawing and guessing game with **live score updates**.
- Implemented a **real-time collaborative environment** using **Socket.io**.
- Designed **back-end services** with **Node.js** and **Express.js** for scalability.
- Integrated **MongoDB** for fast data storage, **managing user sessions** and game states.

Pet Adoption App [🔗](#) | [Flutter](#), [Bloc](#), [Hive](#), [REST API](#), [Custom Animations](#)

2024

- A modern, user-friendly mobile application that **connects loving families** with pets in need of homes. This app provides a seamless experience for **browsing, favoriting, and adopting pets**.
- Implemented advanced, **real-time search** with filters for species, age, breed, temperament, size, and location.
- Designed **responsive UI** showcasing **zoomable high-resolution images** and detailed pet data including personality traits, medical history, and special needs.
- Integrated **dark/light modetoggle**, smooth UI animations, and offline browsing for enhanced usability across devices.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, Dart, C, Java, SQL, HTML

Technologies/Frameworks: Express.js, Node.js, MongoDB, Docker, RabbitMQ, Socket.io, Next.js, React.js, Flutter

Developer Tools: VS Code, Cursor, Android Studio, Apache NetBeans, Postman, Git/GitHub, Vercel, Firebase

CODING PLATFORMS

- Solved **180+** problems on **LeetCode** [🔗](#).
- Solved **270+** problems across **GeeksforGeeks** [🔗](#).
- 3 Star at **CodeChef** (Max Rating **1614**) [🔗](#).

CERTIFICATIONS

- Version Control - Meta** [🔗](#)
- Foundations of Cybersecurity - Google** [🔗](#)
- Python for Data Science - Infosys Springboard** [🔗](#)

EXTRACURRICULAR

- Participated in **HackHound 2.0** and achieved **7th Runner Up Position**.
- Participated in **Hackfed Hackathon (Glitch'24)**.
